2.0 Document Revision History

Version Control Note: All documents in development are indicated by minor versions i.e. 0.1; 0.2 etc. The first version of a document to be approved for release is given major version 1.0. Upon review the first version of a revised document is given the designation 1.1, the second 1.2 etc. until the revised version is approved, whereupon it becomes version 2.0. The system continues in numerical order each time a document is reviewed and approved.

4.0 Introduction

Current international public health activity is aimed at reducing the spread of the currently circulating novel coronavirus, which causes COVID-19 infection. This coronavirus is a novel agent whereby there is no immunity in the world's population to the infection. The two main methods of preventing the spread of infection are hygiene measures and social distancing.

This risk assessment has been produced to identify all controls in place at Winn Group to manage the risks, in as far as is reasonably practical, presented by COVID-19.

Control measures specified to reduce risk are based on current guidance from the UK Government.

5.0 Objectives, Aim & Scope

5.1 Objectives

This risk assessment affirms Winn Group's commitment to have in place control measures that ensure that Winn Group employees can go about their duties in a safe and secure environment.

5.2 Aim

The aim of this document is to define the requirements for physical and environmental controls that will be applied to mitigate the risks presented by COVID-19 in the workplace.

5.3 Scope

This policy applies to

- All employees of Winn Group and associated subsidiaries, contractors, volunteers, vendors and partners;
- All Winn Group premises.

6.0 Risk Ratings

Risk ratings are calculated by considering the likelihood of an event occurring in conjunction with the Consequence should that event occur.

6.1 Determine The Magnitude Of Risk

Magnitude of risk is calculated as *Likelihood + Consequence* where:

	Likelihood	Description
5	Almost Certain	Is expected to occur in most circumstances
4	Likely	Will probably occur
3	Possible	Might occur
2	Unlikely	Could occur but doubtful
1	Rare	May occur but only in exceptional circumstances

	Consequence	Description
5	Catastrophic	Permanent injury or death, extensive damage or disruption
4	Major	Serious injury, significant damage or disruption
3	Moderate	Significant injury, significant damage or disruption
2	Minor	Minor injury, minor damage or disruption
1	Insignificant	No/minimal injury, minimal damage or disruption

6.2 Risk Score Matrix

Winn Group utilise the following risk score matrix to determine the risk rating (the magnitude of risk):

			Consequence ———							
			Insignificant	Minor	Moderate	Major	Catastrophic			
			1	2	3	4	5			
	Almost Certain	5	6	7	8	9	10			
9	Likely	4	5	6	7	8	9			
tikelihood	Possible	3	4	5	6	7	8			
育	Unlikely	2	3	4	5	6	7			
	Rare	1	2	3	4	5	6			

6.3 Risk Rating

Once the Risk rating is determined the following actions are required to address the risk:

Rating		Risk Category	Description						
2 – 4	2 – 4 Low Risk		Detailed action plan required to reduce the risk immediately						
5	5 Medium Risk		Requires Senior Management attention to plan to reduce the risk						
6 – 7		High Risk	Specific Manager responsibility to reduce risk						
8 – 10		Extreme Risk	Manage risk with routine procedures						

7.0 COVID-19 – Risk Register

Key: L – Likelihood; C – Consequence; R – Risk Rating.
